EDUCATION

Bachelor of Engineering
(Electronics and Telecommunication)
Jadavpur University,
Kolkata, West Bengal, India)

SKILLS

Solution Architect / Integration Architect / Data Architect / Cloud Developer / Programmer / Project Management / Change Management / Technology Roadmap / Requirement Gathering / Technical & Business Analysis / Documentation / Programming / Configuration / Customization / Process Improvement / Application Enhancement / Technical Pre-Sales / Data Integration / Migration / Data Conversion / Business Intelligence /Artificial Intelligence / Machine Learning / Cloud Technology

CERTIFICATION

Microsoft Certified in Azure Fundamentals (AZ 900) /
AWS Certified Cloud Practitioner /
IT Automation with Python by Google (managed by Coursera) /
SnowPro Core certification /
Certified in Scrum Master

Technical Skills

AWS, Azure, Google Cloud, Snowflake, Oracle 11g, Teradata, MS SQL Server 2012, My SQL 5.1 Toad, PL/SQL Developer, MS SQL Server Management Studio v18.2, Dbeaver, Erwin v9.7, Enterprise Architect, MySQL Workbench, Python (Panda, Numpy, Pgpy, configparser etc), SQL, PL/SQL, UNIX Shell Scripting, JIRA, Confluence, ServiceNow, GitHub, Quip, Splunk

PROFILE SUMMARY

- Evangelized the partners' practice and solutions in customer implementations, implemented and governed software engineering processes, practices, tools and standards for projects.
- Expertise in driving end-to-end software solutions involving client interaction, requirement analysis, SOW preparation, solution development, solution customization, configuration, deployment and end-user training.
- Proven success of working across various domains such as QSR, Technology, Pharmaceutical, Insurance, Investment Banking, Travel & Hospitality, Telecom, Online Media, and Education etc.
- Have onsite experience with clients from India, US, Malaysia, Saudi Arabia and UAE.
- Played role of **Application architect, Solution architect, Data architect, Database developer, ETL developer**, Manager, Scrum master and Programmer etc.
- Hands-on experience with AWS, **Python**, Snowflake, Oracle in recent years.
- Hands-on work experience in Python with various library like **numpy, pandas, pgpy, seaborn, pyspark, fastapi** etc.
- Hands-on work experience in Python for artificial intelligence work like predicting survey responses, named entity recognition, topic association and non-English data translation into English with iTranslate API integration for a top technology company.
- Hands-on experience with AWS Lambda, AWS CloudFormation, Serverless, S3, Kinesis, CloudWatch, DynamoDB etc. for a leading QSR company.
- Hands-on work experience in RDBMS like Oracle, Snowflake, MS SQL Server, Teradata and exposure to various ETL tools like SSIS, Informatica, Talend with multiple companies.
- Managing complex, high performance, scalable IT solutions and manipulating data into Data Warehouses (DW), Analytical Data Marts (DM) and Operational Data Store (ODS)
- Working on dimensional modeling in Star-Schema Modeling, Snowflake Schema Modeling, and Fact and Dimension tables. slowly changing dimensions, foreign key concepts, referential integrity

RELEVANT WORK EXPERIENCE

Project 1

As Developers, we helped a leading QSR client in their technology modernization project for migrating Informatica mapping/workflow to AWS using **Python**, AWS Lambda, S3, Api Gateway, Serverless, CloudFormation, Kinesis, CloudWatch, Code Build/Deploy/Pipeline. For ETL transformation we **pandas, numpy, pgpy, configparser etc. in python code with various source systems like csv, json, parquet, oracle, snowflake, ms sql server**. We did analysis, documentation with Lucid diagram for all subject areas, develop, test, validate and deploy in Dev and QA environments.

EMPLOYMENT HISTORY

- Since Oct'11 with Cognizant Technology Solutions. Currently as Senior Architect
- Feb'08 – Oct'11 with PricewaterhouseCoopers Pvt. Ltd. as Senior Consultant
- Sep'06 – Jan'08 with Accenture Services Pvt. Ltd. as Senior Software Engineer
- May'03 – Sep'06 with IBM India Pvt. Ltd. as Application Programmer
- May'02 - May'03 with Wipro Technologies Ltd. as Systems Engineer

Project 2

As Data Architect, we helped a leading tech client in collecting and processing data around Customer Satisfaction (CSAT) and measuring business effectiveness via various KPIs. The daily work includes requirement analysis, code changes, deployment, monitoring, coordination, demonstration, documentation, specially mentioning - language translation by third party API invocation, predict customer feedback (POC) etc. with **Python, Snowflake,** AWS, GitHub, Tableau, Quip, Wrike and various home-grown tools.

Project 3

As Data Warehouse Architect, we helped a leading theme park company in their BI platform modernization journey utilizing modern era Azure Data Lake, Cosmos DB, Snowflake Cloud DWH pumping data to Tableau dashboards for different business functions around Ticket sale, F&B sales, package sale and accounting, HR etc.
